Patricia L. Daniel, R.N.

Laser Lights is a full service cosmetic center providing personalized treatments to both men and women. We use the appropriate laser for your individual needs and have advanced technology available for all skin types. Our experienced, nurturing staff and direct medical supervision assures safety, comfort, and superior results.

Laser Services

HAIR REMOVAL

Remove unwanted hair with our advanced medical laser technology. This multi-session treatment can be performed every 4-8 weeks with maximum results visible after 2-3 treatments. Our lasers are FDA approved for safe use on all skin types.

TATTOO REMOVAL

Most tattoos can be removed within a few treatments. The number of treatments will vary based on the amount and type of ink used, as well as the depth of ink in the skin. FDA approved for permanent tattoo removal of all colors and effective on all skin types. Treatments are spaced 4-6 weeks apart.

SPIDER VEIN ELIMINATION/ ROSACEA

Our safe and comfortable vein removal technology provides immediate results without lifestyle interruptions. No needles, no bleeding and no injections. Our equipment treats both spider veins, larger blue reticular veins on the face and legs, and enlarged capillaries associated with rosacea.

FRECKLES (BROWN & RED SPOTS)

Melanin is a dark pigment present in the skin that is produced by melanocytes. When dark pigment multiplies, it forms freckles, brown age spots and moles. Our laser technology can permanently remove pigment such as birthmarks as well as brown and red spots in just 1-2 treatments.

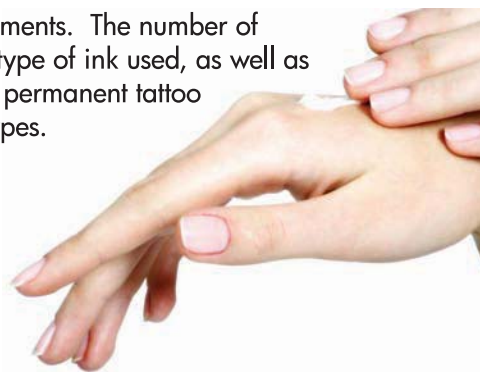

ACNE LIGHT

Our Acne Light is a drug-free, FDA cleared technology that eliminates the bacteria that causes acne. It is safe, effective, painless, and requires zero downtime. Treatments are usually performed twice a week for 4 weeks.

FACIAL REJUVENATION

Wrinkles are caused by collagen loss and repeated expressions. Our Erbium laser is used to treat aging, sun damaged skin to remove superficial and moderately deep lines. Our additional facial rejuvenation laser equipment, including CO2 Fractionated Lasers, will tighten the skin, decrease wrinkle depth by 55% as well as remove fine facial lines and other skin imperfections.

*Facial injectables (Botox®, Restylane®, Juvéderm®, etc.) also available.

Products & Other Services

MICRODERMABRASION (LUNCHTIME PEEL)

Microdermabrasion is a non-surgical exfoliating procedure that will smooth and soften your skin. Our medical-grade unit provides a deeper, more effective peel. Microdermabrasion treats the entire face and neck to erase surface imperfections and reduce fine lines and acne scars without damaging the skin's integrity or requiring downtime. Our treatments include the added benefit of a mini-facial.

CHEMICAL PEELS

Our chemical peels will refresh and rejuvenate your skin with minimal or no downtime. Our aesthetic experts will individualize a program of Fruit Acid, Glycolic, Jessner's, Mandelic, Salicylic, TCA, or Vi Peels for your skin type and lifestyle needs.

ENDERMOLOGIE® (CELLULITE REDUCTION)

Endermologie® by LPG is an FDA approved technique targeting skin dimpling from trapped fat known as cellulite. This non-invasive, painless technique breaks up the fat cells, stretches the underlying tissue and increases circulation throughout the affected area. Treatments vary based on the severity of cellulite and typically take 3-8 sessions to produce noticeable changes.

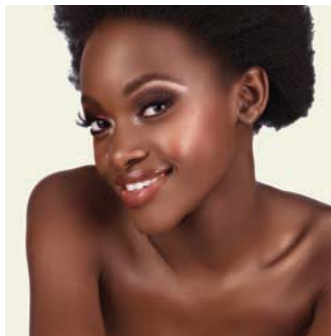

REACTION™ (SKIN TIGHTENING AND CELLULITE REDUCTION)

Radiofrequency energy and vacuum therapy boosts circulation, shrinks fat cells, and stimulates lymphatic drainage to reduce cellulite and circumference of the treatment area(s). Reaction™ also heats the deeper tissues to improve skin texture and reduce wrinkles and stretch marks. Visible improvement can be seen after one treatment, but a series of 6-8 short treatments is recommended for maximum results.

SKIN CARE PRODUCTS

Laser Lights' in-house skin care line and other medical-grade products are designed to enhance your cosmetic results and sustain the ongoing health of your complexion.

We're committed to providing the best, nature-based products available for all different skin types and conditions.
